

## **ALLORAH'S INSIGHTS**

### 2009 YEAR OVERVIEW

Mathematically, the digits 2+0+0+9 total 11. Eleven is considered a master number so we do not reduce it further, however we do acknowledge that it carries the vibration of 2 (partnership and balance). 11 is also the number traditionally associated with the Justice card and the Justice card relates to Libra among other things. I think it helps us to consider that the scales represent both Libra and Justice because the scales remind us that neither balance nor justice are stagnant.

This Fall, Saturn moves from Virgo to Libra. Saturn is associated with the number 8 which is also traditionally associated with the Strength card. Some tarot authors switch the number associations assigning 8 to Justice and 11 to Strength. This reassignment fits in that, Saturn is a Lord of karma and therefore helps to restore justice via balance. 11, being a marriage of equals (two ones) is a beautiful expression of the diligent patient attention required for the lion and lady to become true friends who love, honor and respect one another exactly as they are.

On many levels, the energies of this year provide much support for making the changes we desire. Having this wonderful mingling of cosmic energies in play allows us to tap into the needed wisdom and deep remembrance within each of us in such a way that we naturally create success in our inner lives and therefore, in our outer world. In a nutshell, Venus stimulates our connection to beauty and abundance while Saturn stabilizes our ability to implement the discipline required to bring that beauty and abundance into our experience. Libra is ruled by Venus and the upcoming journey of Saturn through Libra is very much about shifting from a fear based to a love based consciousness.

2009 reminds us and instructs us on the path to our evolution from fear based to love based. If we break it down digit by digit, 2 brings the energy of balance and partnership. The partnership vibration of 2 connects us to "the Force" because two (or more) have gathered. Next, we have the energy of double zero, The Fool partnered. With the Fool comes the faith, connection and trust needed to take the leap in such a way that all things are in fact possible; and because the fool has a relationship with the energy of Aquarius we have the added benefit of Jupiter journeying through Aquarius for the year. Finally, we come to 9, the energy of completion of old cycles in order that we achieve the understanding, transmutation and healing required to begin again, with the wisdom we are speaking of when we say "if I knew then what I know now..."

Totaled together we have 11. Libra, Justice, partnership and balance at a higher, more master vibration than when we were working with the energy of 2. I'm sharing all this with you now because 'intent' is key to getting where you wish to go. This present Mercury retrograde is passing through the energy of Aquarius so we can all get clear on the dynamic change we wish to see, be and make in our world.

If you can dream it, you can do it. Dream big, beautiful heart centered dreams and let's gather together to make them so!

Namaste,  
Allorah
